

CONVERSION OF ATM CARDS TO CONTACTLESS CARDS

Greetings from SBI Singapore.

As an added security feature SBI Singapore will be converting all existing ATM cards to Contactless cards.

We request you to please make a visit to any of our Branches before 31st December 2021 along with your existing ATM card and NRIC/FIN for the conversion of your ATM card. There are no charges or fees for the conversion.

To avoid any overcrowding / rush at the Branches, we will be sending separate communication in a staggered manner to the customers through their registered mobile numbers by way of SMS with the days on which they can visit the branches for replacement, so that the footfall can be managed.

Financial Institutions are required to implement the prevailing SMMs at their customer-facing locations according to the advisories issued by MOM. We apologize for the inconvenience caused and thank you for your patronage and continued support.
